SYNTHETIC DEMO / NOT A REAL MEDICAL RECORD

## INPATIENT DISCHARGE SUMMARY

|                     |                                           |             |                      |
|---------------------|-------------------------------------------|-------------|----------------------|
| Patient Name        | Aarav Mehta                               | Patient ID  | RVH-DEM-260918       |
| Date of Birth       | 12 February 1992                          | Age / Sex   | 34 years / Male      |
| Address             | Pune, Maharashtra                         | Blood Group | B Positive           |
| Admission           | 18 September 2026                         | Discharge   | 21 September 2026    |
| Attending Physician | Dr. Neha Kulkarni, MD (Internal Medicine) | Ward / Bed  | Medical Ward / 3B-17 |

### 1. Presenting Complaint

The patient presented to the emergency department with a 2-day history of fever, productive cough, right-sided chest discomfort and increasing shortness of breath on exertion. On arrival, temperature was 38.4°C, pulse 104/min, respiratory rate 24/min and oxygen saturation 93% on room air.

### 2. Clinical Examination

Patient was conscious and oriented. Mild tachypnea was noted. Auscultation revealed coarse crackles over the right lower lung field. Cardiovascular examination was unremarkable. No peripheral edema was observed.

### 3. Investigations

| Investigation         | Result                      | Reference / Comment             |
|-----------------------|-----------------------------|---------------------------------|
| Hemoglobin            | 13.8 g/dL                   | 12.0–17.0 g/dL                  |
| Total Leukocyte Count | 12,600 /μL                  | Elevated                        |
| CRP                   | 68 mg/L                     | Elevated                        |
| Serum Creatinine      | 0.9 mg/dL                   | Within reference range          |
| Chest X-ray           | Right lower-zone infiltrate | Suggestive of infective process |
| SpO <sub>2</sub>      | 93% room air                | Improved to 97% with oxygen     |

### 4. Diagnosis

**Primary diagnosis:** Community-acquired pneumonia, right lower lobe, without documented respiratory failure.

**ICD-10-CM (demo mapping):** J18.9 — Pneumonia, unspecified organism.

### 5. Treatment During Admission

| Date   | Treatment / Procedure               | Purpose                         |
|--------|-------------------------------------|---------------------------------|
| 18 Sep | IV fluids; oxygen supplementation   | Supportive care                 |
| 18 Sep | IV ceftriaxone + azithromycin       | Empirical antimicrobial therapy |
| 19 Sep | Clinical monitoring and repeat labs | Response assessment             |
| 20 Sep | Transition to oral antibiotics      | Step-down therapy               |
| 21 Sep | Discharge assessment                | Clinical stabilization          |

## **6. Hospital Course**

The patient was admitted for observation and treatment. Oxygen requirement remained low and resolved during the admission. Fever subsided, respiratory symptoms improved, oral intake was adequate and the patient remained hemodynamically stable. No ICU transfer or invasive procedure was required.

## **7. Discharge Medications**

Amoxicillin/clavulanate 625 mg orally three times daily for 5 days; paracetamol 500 mg orally as needed for fever/pain; adequate oral hydration. Medication use is described solely for this synthetic demonstration.

## **8. Follow-up**

Outpatient medical review recommended after 5–7 days, or earlier if fever, breathlessness, chest pain or other concerning symptoms recur.

# INSURANCE CLAIM DOCUMENTATION — SYNTHETIC DEMO

The following section is intentionally formatted as structured claim-supporting information for ClaimBlitz testing.

| Claim Field                   | Synthetic Value                           |
|-------------------------------|-------------------------------------------|
| Claim ID                      | CB-DEMO-2026-10482                        |
| Policy Number                 | DEMO-POL-784215                           |
| Policyholder                  | Aarav Mehta                               |
| Provider                      | Riverview Care Hospital & Trauma Centre   |
| Admission Type                | Emergency → Inpatient                     |
| Admission Date                | 18 September 2026                         |
| Discharge Date                | 21 September 2026                         |
| Length of Stay                | 3 nights / 4 calendar days                |
| Primary Diagnosis             | Community-acquired pneumonia              |
| Demo ICD-10-CM                | J18.9                                     |
| Room / Ward                   | Medical Ward / 3B-17                      |
| Attending Physician           | Dr. Neha Kulkarni, MD (Internal Medicine) |
| Claimed Amount                | INR 48,760.00                             |
| Non-medical / excluded amount | INR 0.00 in this synthetic case           |
